Beam Instrumentation Group **P. R. China**

The **Beijing Electron Positron Collider** is a two-ring e+e- collider running in the tau-charm energy region ( $E_{\text{cm}} = 2.0\sim 4.2$  GeV), which with a luminosity of  $1 \times 10^{33} \text{ cm}^{-2}\text{s}^{-1}$ .

The **High Energy Photon Source**, a 1360 m storage ring light source, with a beam energy of 6 GeV and transverse emittances of 60 pm rad is to be finished in Beijing before 2025.

My personal task including the BPM pick up design, purity measurement and so on. The details will be introduced in poster session.
