

The CERN Accelerator School
is organizing a course on

Superconductivity for Accelerators

24 April – 4 May, 2013

Ettore Majorana Foundation
and Center for Scientific Culture

Erice, Sicily, Italy

This course will mainly be of interest to staff in
accelerator laboratories, university departments
and companies manufacturing accelerator
equipment.

Following recapitulation lectures on basic
accelerator physics and superconductivity, the
course will cover topics related to the design,
production and operation of Superconducting
RF Systems and Superconducting Magnets for
accelerators. Realistic case studies and topical
seminars will complete the program.
