

	18/6	19/6/23	20/6/23	21/6/23	22/6/23	23/6/23	24/6/23	25/6/23	26/6/23	27/6/23	28/6/23	29/6/23	30/6/23	1/7		
08:30	Arrival day and registration	Opening	EM simulations I	RF Power Transport	Basics of RF Electronics I	Beam Tracking I	LLRF I	Excursion	LLRF III	SC cavities I	Free	High beta cavities I	RF for cyclotrons	Departure day		
09:30			Theory of EM fields I	RF power generation II	Overview cavities	Longitudinal beam dynamics II	RF manipulations II		Beam Cavity Interaction	Transverse deflecting cavities		RF Beam Diagnostics II	Magnetic alloy / ferrite cavities		HOM mitigation	
10:30		Coffee							Coffee	Coffee						
11:00		RF measurements I	Longitudinal beam dynamics I	RF networks	Basics of RF Electronics II	Beam Tracking II	LLRF II		RF Beam Diagnostics I	Longitudinal instabilities & intensity effects		Low energy Beam dynamics	Multipacting Breakdowns I			
12:00		Theory of EM fields II	EM simulations II	Low beta cavities	RF manipulations I	Impedances and wakefields	Discussion		Power Coupling	SC cavities II		High beta cavities II	THz and optical acceleration techniques			
13:00		Lunch							Lunch							
14:30		RF measurements II	Block I-1	Block I-4	Free	Block II-1	Block II-4		Block III-1	Block III-4		Block IV-1	Block IV-4		Multipacting Breakdowns II	
15:30		RF power generation I	Course Team	Course Team		Course Team	Course Team		Course Team	Course Team		Course Team	Course Team		Course Team	
			Block I-2	Block I-5		Block II-2	Block II-5		Block III-2	Block III-5		Block IV-2	Block IV-5		Discussion	
16:30		Coffee				Coffee	Coffee									
	Introduction Afternoon courses	Block I-3	Block I-6	Block II-3		Block II-6	Block III-3	Block III-6	Block IV-3	Block IV-6	Closing					
17:00	One slide - one minute	Course Team	Course Team	Course Team		Course Team	Course Team	Course Team	Course Team	Course Team	Course Team					
		All				Poster Session										
18:00																
19:30	Dinner											Special Dinner				
21:00	Python Bar								Social Event					v0.00
